

EQUIPMENT AND UNIFORMS

Equipment and Uniform storage is at Sunnyside Self Storage – 15553 – 24th Avenue, east of King George Highway.

Pickup date will be sent out and/or posted. The Head Coach or a designate must pick up the uniforms and equipment between the designated hours. No equipment or uniforms will be given out before the designated start time – NO EXCEPTIONS!

Each team will receive one uniform for each player on the team according to the registration. No extras. Advise parents to remove stains before machine drying. Any alterations must be temporary. Resize or replacement of uniforms or equipment takes according to the dates on the calendar of events between the designated hours. Any other uniform or equipment problems must be arranged with the Uniform or Equipment Manager respectively.

Uniforms that are handed out to players must be recorded on the form available on the sswrmsa.com website. A copy of this must be forwarded to the Uniform Manager asap.

Equipment and uniforms is one of the largest expenditures for SSWRMSA. If there is a problem with the equipment or uniforms, please contact the equipment or uniform manager. The item may still be under warranty or they may have a replacement for you.

Note: New generation bats are susceptible to denting, especially in cold weather. If your bat is cold to the touch, you should not use it without first warming it up. The bat can cool off while your team is in the field and should be checked at the start of each inning. In addition to denting some aluminum bats can split.

Any bat that is split or dented is deemed illegal under Softball Canada rules and is subject to immediate confiscation by the umpire if discovered. This could result in the Association not being able to exchange the bat if still under warranty. A bat that is dented or split through normal use can be returned during the warranty period and replaced with a new bat. Normal use does not include being used as a hammer or when knocked against a backstop. Dent marks made by a ball are quite distinctive when compared to other damage. Warranty replacement also applies to the bat grip if it comes loose or any other defects from normal use.

Please take care of your equipment! Before returning the equipment ensure it is clean. You could be the one getting the equipment the following year! Equipment and uniforms need to be returned as indicated in the Important Dates between the designated hours by the team coach or designate.
